Dear Judge Bernstein,

I just wanted to express my concerns about needing an equity committee to represent the equity holders in this case. Unfortunately I invested a large portion of my nest egg in this company when the equity shares were high before oil crashed. So not only am I losing on the investment, but I am also finding out I will be liable for income taxes on money I did not make (so-called CODI). I believe the management of the company did not live up to their fiduciary responsibility and just looked out for themselves.

Please find it in your heart to at least appoint an equity committee to represent shareholders like me expecting dividends to live on but are ending up losing more than our investment.

Sincerely,
Don Knight
