To whom it may concern

My wife and I invested our hard earned money because we believed in the company and believed like so many in their assets which they continually boasted of and continue to do all of their advertisements and web site.

Many people in the industry were hurt by the sudden and steady drop in oil prices and we understand that Breitburn Energy energy was also affected dramatically.

While we understand that we do not understand how huge bonuses could be paid while board members made millions of dollars on the backs of the hard-working investors and they continued to trade making even more while toying with the bankruptcy courts.

Bankruptcy unfortunately is a risk everyone takes one they invest however the government is charged with making sure things are done properly and citizens are not taken unfair advantage of. We are hoping that you take a serious look at what happen with this company and help those of us who have lost our entire investments recover some of our losses. Please seriously consider the equity investment committee at the very least. Thank you for your time and consideration.
